BenQ

Spark collaboration Get more work done

Transform your meetings with an intuitive 4K anti-glare display that lets you present, collaborate, and make video calls all in one place. More than just crisp visuals, the BenQ CS series offers tools and features that simplify setups and foster highly collaborative discussions.

We've made it easy for you to present

We've taken out all things that can steal your time and take focus off your presentation. The CS simplifies meeting preparations by removing the need for wires, drives, and even laptops.

Flawless wireless projection

Tired of cables? With the CS, you can wirelessly share up to nine screens using InstaShare.

Control every session

Use the remote as a clicker, cursor, or floating tool toggle for easy annotation and recording.

Access files on the fly

Open and edit your cloud files on the CS through BenQ's Account Management System (AMS) and WPS.

More ways to collaborate

Do more than just present. With multiple built-in features made for effective coworking, you can maximize your meeting time and use the CS display as a functional collaborative workspace.

Work with any platform

Use specialized software from your slot-in computer or external device via the Duo OS window.

Be on the same page

No need to switch from app to app. Duo Windows lets you simultaneously work on two apps side-by-side.

Get hands on with work

Teams can add notes and media on the EZWrite whiteboard via their own devices for better collaboration.

Versatile video conferencing that meets all your needs

The CS and its OPS slot-in computer pair perfectly with popular video conferencing solutions such as Zoom Rooms, Microsoft Teams, Google Meet, Cisco Webex, and LogMeIn GoToMeeting. You can also load the pre-installed TeamViewer Meeting for instant video conferencing.

Suitable for all meeting spaces

Designed for versatility, the CS pairs with different enterprise-grade conference cameras that are perfect for meeting rooms of any size.

DVY21 compact full HD webcam for huddle spaces

DVY22 smart 4K camera for midsize meeting rooms

DVY23 20x zoom PTZ camera for large conference rooms

Informed and always ready

Rooms? Announcements? We've got you covered. The CS series has integrated solutions that let you reserve rooms in advance and keep teams up to speed.

Book rooms with ease

Reserve displays via MeetingRoom365 while simultaneously sending out meeting invites.* The widget keeps everyone up to date about upcoming meetings and room schedules.

*You can use MeetingRoom365 with Microsoft Outlook, Microsoft Office 365, Microsoft Exchange, and Google Workspace.

Push instant notifications

Keep your coworkers in the know. For timely and important announcements, you can use X-Sign Broadcast to push messages to one or more meeting room displays in your office.

Management simplified

Free yourself from fuss. We've streamlined device and user management for you so you can focus on things that matter more.

Hassle-free management

Whether local or remote, you can install apps or centrally monitor, manage, and update multiple displays with ease through the BenQ Device Management Solution (DMS).

Easy user management

Add users and edit permissions for all your displays in just one go. BenQ's Identity and Access Management (IAM) system syncs with your AD server for seamless user management.

Data and device protection

Defend your displays against malware, rogue apps, and malicious sites, while securing your corporate data. BenQ offers you IoT security through McAfee Mobile Security.

Control at your fingertips

Already on Extron? Then there's no need to switch. The CS fully integrates with Extron so you can easily adjust your displays to your liking without ever having to change system controllers.

Real-time troubleshooting

Need technical support? Save your administrators time and effort by utilizing TeamViewer on your display to conduct real-time remote assessment and troubleshooting.

Virtual workspace access

With the VMware Horizon Client, you can pull up any of your virtual desktops on the CS to get instant access to your hosted apps, files, and folders anytime during a meeting.
